PROFESSIONAL SUMMARY

User-focused designer and developer who builds interfaces that solve real problems. Designed and launched a responsive, mobile-first booking website from client brief to live production, built an internal web tool that cut a 45-minute task to under 5 minutes by refining it with its real users, and delivered a full-stack AI flight booking platform (React, Django, Claude API) for a university client. Skilled in Figma, HTML5, CSS3, JavaScript and React, with a strong focus on usability and clean, intuitive layouts. Seeking a UI/UX role to learn from an experienced design team and grow into a specialist.

SKILLS

UI/UX Design: Figma, responsive and mobile-first design, user flows, requirements gathering, usability refinement, input validation and error prevention
Front-End: HTML5, CSS3, JavaScript, React, Jinja2, WordPress, SEO
Back-End and AI: Python, Flask, Django, PostgreSQL, REST APIs, Claude API (Anthropic), Stripe, Amadeus API, ReportLab, PIL, OpenCV
Tools: Git, GitHub, IIS, Active Directory, Microsoft Office, service desk ticketing

PROFESSIONAL EXPERIENCE

IT Support & Web Applications Intern | Nepean Rubber & Plastics Company | Feb 2025 - Jan 2026
- Designed and built web-based tools for engineering staff, shaping the interface around how the team actually works.
- Gathered requirements from engineering stakeholders, tested functionality and refined usability based on real production use.
- Deployed and supported applications in a live manufacturing environment, resolving access and configuration issues during rollout.

Freelance Web Developer | Remote | May 2025 - Nov 2025
- Delivered AutoAidPlus.com.au end to end: client requirements, layout and user flow, build, SEO setup and launch.
- Made ongoing usability and performance improvements after launch based on client and customer needs.

IT Help Desk Support | Television Broadcasting Company | May 2019 - Nov 2021
- Resolved 15-30 tickets a week for a 30-person organisation, explaining solutions clearly to non-technical users.
- Managed account provisioning and remote support, logging incidents accurately through service desk workflows.

SELECTED PROJECTS

Booking Travel with AI | React, Django, PostgreSQL, Claude API, Stripe, Amadeus API | Western Sydney University, Aug - Oct 2025
- Worked in a team of four to deliver a full-stack AI flight booking platform for a real client across two Agile iterations.
- Built user account management and personalisation features, and integrated the Claude API for AI flight recommendations.
- Contributed to flight search and Stripe payment integration, and authored the final handover and completion report.

AutoAidPlus.com.au | WordPress | Live in production
- Designed a mobile-first booking flow for a service business that makes it quick for customers to book.

PU Screen Generator | Python, Flask, JavaScript, HTML/CSS | GitHub
- Built an engineering tool with in-app preview, input validation and one-click PDF export, cutting drafting from 45 minutes to under 5.

Woven Wire Weight Calculator | JavaScript, HTML/CSS | Live demo
- Built a fast client-side calculator for instant weight estimates during quoting, now in active daily use.

EDUCATION

Bachelor of Information and Communication Technology (Cyber Security and Ethical Hacking) | Western Sydney University | Mar 2023 - Nov 2025
Diploma of Information and Communication Technology | Western Sydney University | Oct 2021 - Dec 2022
4 High Distinctions and 10 Distinctions across Diploma and Bachelor studies.

CERTIFICATIONS

AWS Certified Cloud Practitioner | Cisco Networking Certification | Microsoft Excel Advanced (Western Sydney University short course)
